

BADER BAHASHWAN

Jeddah, Makkah, Saudi Arabia | +966563792201 | bader.b2001@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack & DevOps Engineer with hands-on experience building web platforms, backend APIs, CI/CD workflows, containerized environments, and cloud-oriented deployments. Skilled in React, Next.js, NestJS, ASP.NET, Docker, Kubernetes, Terraform, Ansible, AWS, OCI, GCP, GitOps, and observability.

WORK EXPERIENCE

Freelance Full-Stack & DevOps Engineer | 2024-Present

- Build client portfolio websites and custom web apps from requirements to delivery, covering UI development, backend integration, and deployment preparation.
- Connect full-stack applications to CI/CD workflows, containers, infrastructure scripts, and cloud deployment setup.

Software Engineer Intern | Ashl Communication & IT | Jeddah | Jul-Aug 2024

- Completed training on Ashl's software products, internal tools, and sales workflows, passing program knowledge checks and building practical understanding of how solutions are presented to clients.
- Tested key website flows during internship onboarding, identified a broken primary action button, and reported reproduction steps that helped the team resolve the issue.

EDUCATION

Hadhramout University | Bachelor of Computer Engineering | 2025

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Oracle Cloud Infrastructure 2025 Certified Architect Associate

TECHNICAL SKILLS

- **Programming & Web Development:** JavaScript, TypeScript, React.js, Next.js, Node.js, NestJS, Python, C#, ASP.NET, REST APIs, Vite, Tailwind CSS, Prisma, Pandas, NumPy, Jest, Postman, Swagger
- **DevOps:** Kubernetes, Docker, Helm, Argo CD, GitOps, Terraform, Ansible, DevSecOps, Git, GitHub Actions, GitLab CI/CD, Bash
- **Cloud & Databases:** AWS, GCP, OCI, PostgreSQL, Microsoft SQL Server, MongoDB, Redis, BullMQ
- **Observability & Monitoring:** Prometheus, Grafana, Loki, Jaeger
- **Operating Systems:** Linux, Windows
- **Languages:** Arabic (Native), English (Professional Working Proficiency)

PROJECTS

StayOps — Hospitality Booking Platform | Jun-Jul 2026 | [GitHub](#)

Technologies: Next.js, React, TypeScript, Tailwind CSS, NestJS, Prisma, PostgreSQL, Redis, BullMQ, Docker, Docker Compose, Caddy, GitHub Actions, GHCR, Jest, Postman, Swagger, Terraform, Ansible, GCP

- Built role-based dashboards and workflows where customers can search and book rooms, hosts manage properties and availability, and admins handle users, moderation, bookings, payments, reviews, and notifications.
- Wrote the NestJS/Prisma backend for JWT auth, role-based access, ownership checks, booking status changes, payment records, reviews, notifications, and PostgreSQL models.
- Set up Redis/BullMQ for queue and cache support, built CI/CD workflows for tests, security scans, and GHCR publishing, and wrote Terraform/Ansible scripts for GCP deployment.

OpsPilot — DevOps Service Health & Release Tracking Platform | Mar-Apr 2026 | [GitHub](#)

Technologies: React, TypeScript, Vite, Tailwind CSS, NestJS, Node.js, Prisma, PostgreSQL, Docker, GitHub Actions, Jest, Postman, Swagger

- Built an internal dashboard to track services, deployments, health status, incidents, and audit logs in one place.
- Added per-service API keys for CI/CD deployment reporting, with Swagger docs, Postman checks, and Jest coverage for the main backend flows.

Production-Style Microservice DevOps Portfolio | Apr-May 2026 | [GitHub](#)

Technologies: AWS, Amazon EKS, Terraform, Kubernetes, Argo CD, GitHub Actions, Docker, GHCR, OpenTelemetry, Prometheus, Grafana, Loki, Jaeger, kubeconform, CloudWatch

- Deployed the OpenTelemetry Astronomy Shop on EKS using Terraform, Kubernetes, Argo CD, and an AWS load balancer.
- Set up Argo CD to sync Kubernetes manifests from the repository to the cluster, keeping deployments version-controlled and easier to roll back.
- Set up monitoring with Prometheus/Grafana for metrics, Loki for logs, Jaeger for traces, and CloudWatch for AWS logs and infrastructure visibility.

ServeMe — Social Services Marketplace Graduation Project | Jan-May 2025 | [GitHub](#)

Technologies: ASP.NET, C#, Entity Framework Core, SQL Server, Razor Views, Bootstrap, Docker, Docker Compose

- Created a service marketplace where customers can browse and book wedding, graduation, tourism, and event services from providers.
- Built role-based dashboards for customers to manage bookings and wallet transactions, providers to manage services and orders, and admins to manage users, services, payments, ratings, and comments.
- Designed the SQL Server schema for bookings, orders, wallet transactions, ratings, and comments across the marketplace workflows.

Kubernetes GitOps & Local Cluster Management | Apr 2026 | [GitHub](#)

Technologies: Kubernetes, k3s, Helm, Argo CD, Docker, GitHub Actions, Prometheus, Grafana, SonarCloud, Trivy, Rancher

- Built a local k3s cluster managed through Rancher and deployed containerized applications through Kubernetes.
- Packaged the application with Helm and used Argo CD to sync changes from Git, making deployments easier to review, repeat, and roll back.
- Added Prometheus/Grafana monitoring and GitHub Actions checks with SonarCloud and Trivy for code quality and container security.
